

A Straightforward Path to Licensing Our Blockchain Patent Portfolio

ABOUT THE PORTFOLIO

Rock Innovation LLC holds three issued US patents covering systems and methods for blockchain block reconciliation and management. With a priority date of November 19, 2016, these patents predate the vast majority of Layer 2 rollups, cross-chain bridges, DeFi protocols, and enterprise blockchain platforms in operation today. The portfolio comprises 28 claims across US 10,192,073; US 10,943,029; and US 11,720,711, all active and maintained through their full patent terms.

THE LICENSING PROCESS

1 Initial Outreach

The process begins with an introductory letter and a high-level claim chart showing how the patent portfolio relates to your product or service.

2 Technical Review

Both parties review the detailed claim charts, patent specifications, and prosecution history. We provide complete documentation with element-by-element mapping and evidence citations for your technical and legal teams.

3 Commercial Discussion

After both sides have assessed the technical merits, we move to a business-focused conversation to determine the licensing structure that best fits your organization. Our goal is terms that reflect the scope of use and work for both parties.

4 License Agreement

We execute a license agreement granting your organization freedom to operate under the full Rock Innovation patent portfolio. Agreements are designed to be concise, clear, and completable within standard business timelines.

LICENSING STRUCTURES

Paid-Up License

A one-time payment that grants a perpetual license for the remaining term of the patents. No ongoing obligations, reporting, or audits.

Running Royalty

Periodic payments based on an agreed metric (revenue, transactions, or users). Lower upfront cost with payments proportional to scale of use.

Flat Annual Fee

A fixed annual payment for the duration of the license. Predictable budgeting with no usage-based calculations or reporting requirements.

FREQUENTLY ASKED QUESTIONS

Does the license cover future products and services?

Standard licenses cover current and future products that fall within the scope of the patented claims for the full remaining term of the patents.

Are all three patents licensed together?

Yes. We license the full portfolio as a family, providing comprehensive coverage as your product evolves.

What documentation do you provide?

Patent summaries, claim charts with element-by-element mapping, prosecution history, and a technology mapping guide, all at rockinnovationip.com.

Get Started

We believe licensing works best when it is professional and transparent. All patent documentation, claim chart templates, and technology guides are publicly available on our website for your review before any conversation takes place.
